WHAT WE DO

Our Services

Three connected service areas, designed around the operational requirements of each client.

01

Industrial Equipment Supply

Sourcing and supplying suitable industrial equipment, matched to operational requirements and coordinated through the procurement process.

- Sourcing
- Selection
- Coordination

02

Maintenance Support

Practical support with equipment-related issues, maintenance planning and follow-up, coordinated around each client's needs.

- Planning
- Technical assistance
- Follow-up

03

Technical Consulting

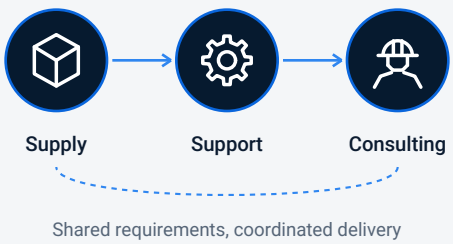

Clear, practical technical input that helps organisations evaluate options and make informed equipment decisions.

- Requirements
- Options
- Recommendations

WORKING TOGETHER

One connected offering

Technical consulting helps clients define what is needed, equipment supply delivers it, and maintenance support helps keep it working. Together they keep requirements, supply and support aligned.

OUR SERVICES · 01

Industrial Equipment Supply

Apex helps organisations source, select and coordinate the industrial equipment their operations depend on.

01

Equipment sourcing

Identifying and sourcing industrial equipment that fits the requirements of the application.

02

Requirement-based selection

Selecting equipment against the operational requirements and conditions it will work in.

03

Suitability & application

Considering product suitability and how the equipment will be applied on site.

04

Supply coordination

Coordinating the supply process so equipment and information stay aligned.

05

Procurement support

Staying involved throughout the procurement process, from first enquiry to delivery.

From requirement to delivery

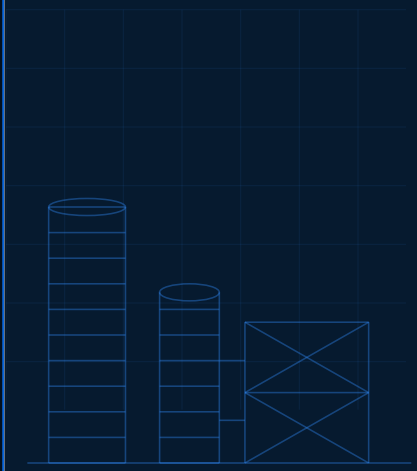

Requirement — Selection — Supply — Support

OUR SERVICES · 02

Maintenance Support

Practical support for maintenance-related requirements, coordinated clearly and followed through.

Scope is agreed with each client.

HOW SUPPORT WORKS

From first question to follow-up

01

Maintenance support coordination

Helping organise and coordinate maintenance-related requirements so the right people and information are aligned.

02

Understanding equipment-related issues

Taking time to understand what is happening with the equipment and the conditions around it before suggesting a way forward.

03

Practical technical assistance

Offering clear, practical technical input that helps clients move from a problem to a sensible next step.

04

Maintenance planning support

Supporting clients as they plan maintenance activities, equipment needs and priorities.

05

Communication and follow-up

Keeping clients informed and following up on open items until requirements are addressed.

OUR SERVICES · 03

Technical Consulting

Clear, practical guidance that helps organisations understand their requirements and choose suitable equipment with confidence.

Understanding operational requirements

Starting with the client's operating conditions, constraints and objectives.

Evaluating technical options

Comparing the practical options and what each means for the application.

Practical equipment recommendations

Recommending equipment that is suitable for the job and realistic to apply.

Supporting informed decisions

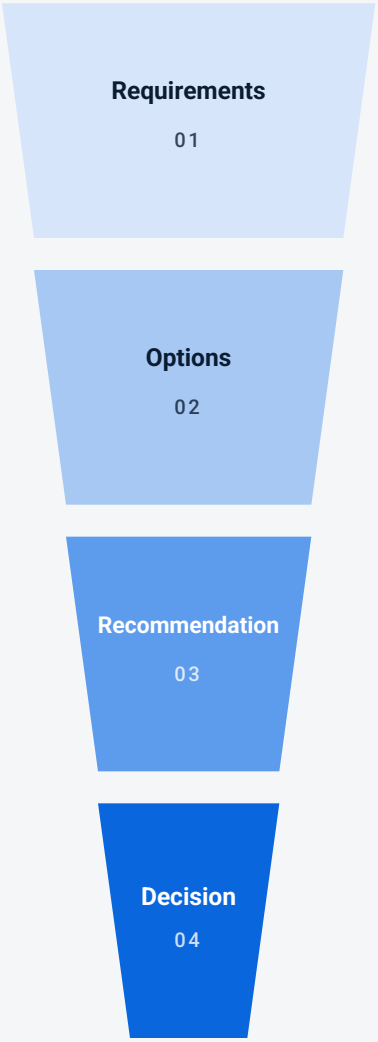

Giving decision-makers clear technical information to work from.

Identifying suitable solutions

Helping organisations arrive at solutions that fit their requirements.

FROM NEED TO DECISION

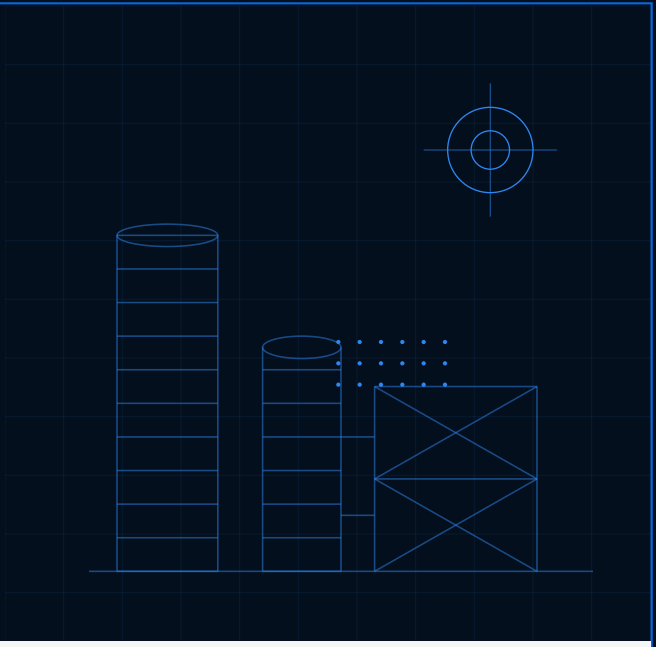

How consulting narrows the path

Informed decisions and solutions that fit.

MANAGING REQUIREMENTS

Operational Support

How Apex helps organisations manage their industrial requirements, from first conversation to follow-up.

01	02	03	04	05
Understand requirements	**Coordinate** needs	**Align** priorities	**Communicate** progress	**Follow up** on open items
Understanding what the client needs and the context it sits in.	Coordinating equipment and support needs across the people involved.	Agreeing what matters most, so effort goes in the right order.	Keeping clients informed about where things stand.	Following up on outstanding requirements until they are addressed.

Requirements are revisited as work progresses

WHAT THIS MEANS FOR CLIENTS

01

Clear priorities

Everyone works from the same view of what matters most.

02

Visible progress

Clients know where their requirements stand.

03

Nothing left open

Outstanding items are tracked and followed up.

OUR FOCUS

Industries We Support

INDUSTRY 01

Manufacturing

Supporting production environments through suitable equipment, practical technical input and dependable supply coordination.

Equipment | Technical input | Supply coordination

INDUSTRY 02

Mining

Supporting demanding industrial environments with equipment-related assistance and practical technical solutions.

Equipment assistance | Technical solutions

INDUSTRY 03

Energy

Supporting energy-related operations through equipment supply, technical input and coordinated support.

Equipment supply | Technical input | Coordination

HOW WE WORK

Our Approach

Five connected steps that take a requirement from the first conversation through to follow-up.

One consistent path from requirement to review.

Each step builds on the one before it.

OUR COMMITMENT

Safety, Quality & Responsible Delivery

Responsible delivery is part of how we work. These principles guide how we make decisions, communicate and support our clients.

01

Safety-conscious decision-making

Keeping safety in view when recommending equipment and coordinating support.

02

Clear communication

Explaining requirements, options and progress plainly, so everyone knows where things stand.

03

Responsible equipment selection

Recommending equipment that is appropriate for the application and its conditions.

04

Careful coordination

Aligning supply, support and information with care, so details are not lost along the way.

05

Professional conduct

Dealing with clients and partners honestly, respectfully and professionally.

06

Continuous improvement

Learning from each engagement and looking for better ways to serve clients.

WHAT GUIDES US

Our Values

Five values shape how we work with clients, partners and each other.

01

Reliability

Building trust through dependable support.

02

Safety

Keeping responsible practices in mind when supporting industrial environments.

03

Integrity

Communicating honestly and acting professionally.

04

Practical Innovation

Looking for useful, effective ways to address operational challenges.

05

Partnership

Building positive working relationships with clients.

Our values guide how we supply, support and advise.

OUR STRENGTHS

Why Choose Apex

A focused team combining industry understanding, integrated services and practical thinking.
